THE WAR OF THE FUTURE.

THE WAR OF THE FUTURE.

Yesterlay's telegrams contained a significant amouncement of the opinion of the American Press as to the inevitableness of the war between Japan and the United States. The rouble has only just commenced, but as the Spectator' remarks in an article on the subject, it may rapidly become serious. The yellow peoples are very proud and very sensitive. They do not netnowledge—as, for example, the negroes have hitherto done—that there is any inherent inequality between themselves and the white men; and, not acknowledging it, the weight of argument is entirely upon their side. They do not even understand why their "intrusion" is disliked, and they see their way to reprisals which might in certain contingencies—as, for instance, agreat European war—develop into active hostilities. The subject should therefore be dealt withefore the Government have caught fire, and while the classes which are not affected in both sets of countries are prepared to lister to reasonable argument.

That argument should, we think, be based upon the assumption, that the raegs will, for the present at all wents, to well to keep apart.

ipon the assumption, that the races will, for the present at all events, do well to keep apart. Their instinctive hostility—or shall we say jealousy?—may, and probably will gradually die

away; but it has lasted for ages, and has become in the course of thege ages one of the fixed conditions of thought and feeling among the masses, making a just equality of treatment for the moment nearly impossible. The Far Eastern States, for example, cannot confine their entire that the series of the series of the best character, while the white States cannot cocrete their neutionable populations into accepting their yellow competitors as friends and helpers. The movement, if it became general, must inevitably develop small industrial civil wars; and diplomatists may on that ground alone use all their energies to prevent by agreement what must otherwise prove a disturbing contact, in the absence of which peace between the races might reign for ages.

But, the diplomatists will ask with reason, on what lines are we to suggest agreements? They will be difficult to arrange, but they are not altogether impossible. As we understand the matter, none of the Far Eastern Governments are particularly anxious that their subjects should emigrate, on the other hand, Europeans and Amsfrans of the working class for actilement, It must therefore be possible or for the Governments on both aides to discourage emigration; as, for instance, the Government of India now does whenever the demand comes from piaces which it considers unavaitable under the prevailing conditions, or unwhole-some of the far Eastern Government fan concorrect provides and the subject should be subject to the far Eastern States as place for settlement, It must therefore be possible our findiance of the working class of account of minds of discourage emigration; as, for instance, the Government fan concorrect provides and contract entire and the subject is considered unavaitable under the prevailing conditions, or unwhole-summent and concorrect provides and contract entire and the subject is contracted and the contract entire and the contr as once or twice used its reserved power to has once or twice used 15t reserved power to control emigration in a very decided way, once nearly ruining the colony of Réunion, for exam-ple, which depended upon a supply of Indian labour, when it suspected for knew that the emigrants, under a delusion about the danger from cholera, were being harshly treated. These greements once made, the whole question would be under the official control of the responsible Governments, who might, by intro-

would be under the official control of the responsible Governments, who might, by introducing a passport system, prevent over-numerous immigration without preventing, or even restricting, the ordinary movements of commerce or shipping. They could pass' all traders' agents or bagmen, while forbidding coolies to be taken on board. Diploinatists may easily make better suggestions than this, but this is the object they should seek, and seek now, before any overwhelming demand or habit of migration renders precautions hopeless, or so better any overwhelming demand or habit of migration renders precautions hopeless, or a burdensome to great "interest" that the Foreign Offices would no longer retain a free hand. They may rely on it that it will be many years, perhaps many decades, before the jealousy of the white workmen will subside; while it is most unreasonable to expect that the Fareign Offices would no longer retain a free loady of the white workmen will subside; while it is most unreasonable to expect that the Far Eastern populations, which are so ateadily claiming their place in the airrangements of the world, will for ever bear to see their children insulted and injured because of an abstract theory that their presence is injurious to alien coefficient perpisals, and therefore they may neglect the subject; but that is an illusion even bing that of the Russian statesmen who fancied, before the war, that Japan was a little Power which, even if it felt affronted, could be asfely defield or coerceed. These States are not minor Powers, but are as assonitive as if they were: and if affronted, they may find could be sarely defield or coerced. These States are not minor Powers, but are as sensitive as if they were; and if affronted, they may find means of asserting themselves which will produce a sense; if not of tilmany, at least of perplexity in very great Governments indeed.

HARBOUR IMPROVEMENTS.

PROGRESS OF A GREAT WORK.

Considerable progress has been made of late in the great works intended to improve the accommodation of the port of Alexandria. That four most important undertakings are: (1) the inolessre of the outer harbour at the cost of LE 120,000 by prolonging the great break water and by throwing out a breakwater and by throwing out a breakwater from the niew extile port quay; (2) the confrontion of three new timber quays for aix historical of the contraction of the contract shipe; (3) the construction of a new coal quay for eight ships; (4) the construction of the Arsenal quay with bertia for four ships; (5) the creation of a new pass capaships; (5) the creation of a new pass capa-ble of allowing the largest commercial steamer to pass safely in and out of the port in all weathers, and, in conjunction with the existing pass, to provide an alternative exit and egress, in case of a block in one of them. We will deal with the present state of each of these works in the order given above.

THE BREAKWATER.

THE BREAKWATER.

The two branches of the breakwater will be each 450 metres in length. The extension from the land side, which juts out from the made, and will not be finished before May. 1st, 1908. The work on the priologation of the great breakwater began last Augrab, and already one hondred metres up, to the lawel of the sea have been built. Three hundred metres have been constructed to a distance of three interes below eas level. The whole extent of this branch will be complete next November.

COAL QUAYS.

Two berths of the new onal quays were followed by the last March, A third berth was completed in Desember last, and a foorth last month. The fifth berth will be ready by-rext Angetis. The three other berths, of the total of eight, will be ready by the last January, 19(9. The construction of the new timber and coal quays is most necessary to prevent the forther congection of the port. In 1994, 615,000 tone of coal were imported, in 1905 this figure rose to 1,132 635 tons, and last year to 1,109,754 tons. The value of the wood imported in 1950 was LE. 495,000. It 1905 the wood imported in 1950 was LE. 495,000. It 1905 the wood imports amounted to LE. 1,829,219 in value.

ARSENAL QUAY.

Two berths, together with the sheds, will be handed over by the engineer on the lat January next. Two others will be completed by the first June, 1908. The site of the old jatty attached to this quay, which was made in 1810, has already been partly dredged, and 200,000 square subic metres of embankment have been constructed there. The old walls will be utilised for the works.

will be atilised for the rouse.

THE NEW PASS.

Vossels will be able to use the new pass from hear Jaly. The advantage of the new pass, in yiew of the continual increase in the size of commercial steamers, is obvious. Although, in pertectly smooth water, the largest commercial steamer, when in light draught not exceeding 28 feet, might enter the port with safety, they could not do so if Jaden with sarge, or during had weather, and, in any case, might, after enterthempt of the property of the safety of could not do so if lades with easy, or during bad weather, and, is any case, might, after suctive, they could leave with asfety. At these diffici-ties will be things of the past by next July. The work has necessitated considerable labour. Two hopper berges, a design, and a tra-arrived last year for the enterprise. Their total court was about LE. 50,000 and they were applied by Symouth of Renfrew. The British Admirally leath the Expution Government two Admiralty lent the Egyptian Government two powerful rook dredgers. They have been at work for some time, and have nearly finished work for some time, and have nearly named the now pass. These A limital'y drelgars have contributed greatly to the economy of the updetaking, and have proved them elves admirably adapted for the work, making it possible to dispense with the de'ay and expense of blasting operations.

MINISTRY OF JUSTICE.

A MUCH-DISCUSSED APPOINTMENT.

The question of the appointment of a new resident of the Native Court of Appeal has president of the Native Court of Appeal has assued a considerable amount of discussion in the native and European Press, and complished have been made that the probable passing over of Affil Bay in favour of Yabis Bay Ibrahim is contrary-to the regulations of the Ministry. It is also stated that Yabis Bay is junior not only to Affil Bay, but to Magdi Bay, and Abund Bay Zulfosa.

But as a matter of fact Magdi Bay and Yabis Ray Ibrahim started the Court of Annals on

Bey Ibrahim entered the Court of Appeal on the same day (June 27, 1892), while Zufitan the same day (June 27, 1878), while 27 intal Bey was only appointed on February 29, 1876 In any case the appeal of a Cairo contemporary to the Decree of November, 1893, appears to be beside the mark. Art. 11 of this Decree states that "Lavanosemend d'une olsses à une actre, d'une même fonction à une autre, auron lies an tennet compte d'une files à la faccier actre, d'une même fonution à une autre, auront limite on un tenant sompte des mérité et de l'ancienté des candidats." This article is of general application placed in Section I of the Decree "des Magistrats" and does not refer to any special appointment. In any case it is explicitly stated that "merit" must be reckoned with sociority in the choice of a magistrate, and in prantice secior judges have been passed over for the posts of vice-president or a Court on the ground that they did not possess the requisite authority and the necessary administrative caproity. In this case we understand that the Minister of Jardice and the Jadicial Advisor have been advised by competent authorities at to the merit of the candidate that attendings as to the merit of the candidate and the support of the candidate of the candida tent authorities as to the merits of the dates for the presidency of the Native Court of Appeal. Under the circumstances we do not see on what grounds the cry of "injustice" has on what grounds the ory of 'injustice' been raised by one of our contemporaries reference to the appointment in question.

A REMARKABLE ESCAPE.

On Sunday afternoon, the children of Mr. Alexander Alderson, ot Rambel, while driving with their governoss and narse, were precipitated into the annal-drain by the side of the road leading from the Mahmondieh Canal to Bidd Gaber. It is supposed that the wheel of the sakieb frightened one of the borse, which foll, dragging the other horse and the carriage down the steep side of the drain (a drop of about four metra). The compants of the carriage all rolled unto the dirty, moddy water. Fortunately, the narse retained her hold of the baby, and these ware the only ones not completely immersed. O the bidge polled out by the obaby, and these ware the only ones not completely immersed. O the bidge polled out by the ocachinan (who behaved apleadily throughout) is children failed, for the moment, to recognise such other, so besensed were they with mod. It is a marter for congratulation that so little harm was done by what might have been a very serious accident, for, had the carriage pinned its occupants beneath it, it is difficult to see how all could have been awed. As it was, beyond a-light bruits estatained by the carriage, no ones war any the worse for the upset. The horses escaped injery except for a few cuts. At the moment of the accident Dr. Beyt and Mr. Nowan Alnone were driving past and kindly took the dripping, mud-stained party home in their carriages.

We hear that the Moulcipality has had the intention of covering this drain for some time. This is now the second soldent that has courted at this spot, and it is some astification to know that the work is to be begun at once.

QUESTION OF NEW SITE.

Sooner or later the present site of the Alexandria Sporting Club will have to be changed, for owing to the great rise in the value of building land in the immediate usigh bourhood of the city the site will become to walashle to remain in its present condition.

value of building hand in the immediate ueighbourhood of the city the site will become stowalcable to remain in its present condition. The discussion of the pros and cours of this question has again come forward and a great deal of rapport is being given in favour of Sionf. There is a considerable extent of uncompied land there, and as it is no close proximity to San S'efano and the Palace of the Khedivish Mother, it cannot be considered too far from Rumbh for the purpose.

Prince Omar Pasha Torescon, who is the president of the Alexandria Sporting Glub, is in favour of the Sionf coheme, and it is supported by many local sportamen, who consider that the project of transferring the A. B. C. to Nouths is to be depressated on the ground that the space there is too oramped for a good recourse. Moreover, Nouths is too out-of theway for both the inhabitants of Ramba has wallast the Alexandriane and silved some of the advantages of Sionf for the creation of a replendid hippodrome. The latter is only a quarter of an hour from Alexandria by motor-ar, and is convenient of access from the Rumbh line. The wide stretch of open country there is far more soitable for a reaccourse and delightful walks would have to be hopelesely marreal to make wy for a race course and all the other appretamences of a Sporting Club.

Another alternative scheme is the Hadra Lake site. The lake would have to be drained, which would not be a vary difficult task, and the site is convenient. But it may well be arged that in years to come, owing to the succourses.

and the site is convenient. But it may well be urged that in years to come, owing to the enormous expansion of Aexandria towards the east, this site will be in time found to fall a prey to the builder just as is the existing site. No soub-objection can be urged against the choice of Stone. In such a case as the selestjon of a new site for the Alexandria Sporting Glob it is most eccessary to look as far forward as possible, and from this point of view the Stone fatte is nearcoptionable.

His Highness's idea is also, in our opinion, a very happy one, and deserves local support Booner or later the new site of the Alexandria Sporting Club will have to be chosen, and the sooner a definite decision is arrived at the better for the club and its members. Prince Omar is to be congratulated on raising the question, and we hope that his idea will receive the support that it merits.

Sir,—At the barquet that was beld in honour of Mr. Robert on, M.P., Mr. Dicey is reported to have said the following, which I translate from "Al Minbar":

"The longer I stay in your beautiful country which I consider a second home to me (111) I become counted that between East and West there is a great abyse that cannot be crossel from either side."

In other worde, he reiterates the two notorious lines of Kipling's:

East is East and West is West.
The twain shall sever meet.
In answer I beg to refer Mr. Dicay to the following except from "A People in Behool," by Mre Fielding Hall, if I remember correctly. She says: "There is no such thing as Notice and the same a twain that may and will meet, and they have already met in favour of the former—that was not far away from an expectation." TO OUR VISITORS.

The Egyptian Gazette has much pleasure The EGUPHARIGA; cffc has much pleasure in presenting to its subscribers the accompanying description of some of the many interesting routes by which they may travel homewards threat care has been taken to arrange ffem as accurately and concisely as possible, and it will be found that none of them were fraught with difficulty in choosing, the route home that difficulty in choosing, the route home the difficulty of the control of the contr

This depends partly upon the month in which you leave Egypt, for Cairo in January may be a little wamer than the Riviera, and possibly not so wam as Sicily, bet in March it will be warmer than Rome, and more uniformly warm than many other places in Europe. Many people leave Egypt far-too early in the year, for as a rule the weather in April and May is perfect. The warmest place to go to on leaving Egypt is Sicily. Some will want to take into consideration the number of days to be spent at see, and we therefore subjoin a list showing the time corpied on each of the various routes between Egypt and the Continent of Europe.

CENTRAL ITALY.

They are as follows:—
The long sea routes—from Port, Said or Alexandria to Plymouth, Southampton, London or Liverpool—occupy about 14 days. The short ones are as fellows:—
Port Said or Alexandria to Brindisi 3 days
Alexandria to Messina ... 3
PortSaid-Alexandria to Marseilles 5 ...
Alexandria to Venice and Trieste... 3½ ...
Alexandria to Naples ... 4 ...
Port Said to Renoa ... 5 ...
Port Said to Naples ... 4 ...

The quickest through Continental routes are by P. & O. Brindisi express from Port Said, and the Austrian Lloyd Trieste-Vienna express from Alexandria

cepress from Alexandria.

As regards heavy loggage, it must be borne in mind that very little luggage is allowed free on the milways of Europe, but there are several good and responsible forwarding agents in Egypt who undertake at a fixed charge to deliver packages to any address in Europe.

The quickest manner of getting to Europe from Port Said is undoubtedly by the fast Mail Steamers "Osinis" and "Hiss" to Brindist. One of these leaves Port Said every week, as soon as possible after receiving the Indian

mails from the great liner arrived from Bonbay.

These small but comfortable ships have enormously powerful engines, and attain a very high rate of speed. They sace called the Ferry boats, having been specially built to carry the British mail from Fort Said to England you will hind the train stating at Brindis which will take you to Calais without changing. It has complete arrangements for sleeping and eating on board, and you should arrive in London on the fifth day from leaving Fort Said.

SICHY HOTELS EN ROUTE. The direct route to Sicily is by the Florio-Rubattino Cd's steamers, which leave Alexandria weekly for MESSIAN, where one takes train to TAORMINA, one of the most charming and popular places on the island. Giardinis to the action at which to alight, and the drive is the action at which to alight, and the drive a vott sone hour. In and around the town is m-cho interest the visitor. The theatre is 'Greek origin, but restored under the Romans. CATANIA is the starting place for the ascent of Etna, and here also is a fine Cathedral. The Greek, Roman, and Samcenio remains that are found all over the island, are an endless source of pleasure. SYRACUSE has an interesting bistory, having been a 'Greek city, which was designed by Demosthenes in S. 413, and taken by the Komans in no 212, when Tachimedes was slain—his tomb is to be the control of the capital of the Island, and enjoys a cligithful climate, Much of interest is to be found in this fine city The Palazzo Reals is of Samcenio origin and close to the church of S. Giovannia degli Erimiti with its click the church of S. Giovannia degli Erimiti with its picturesque cloisters. NORTHERN ITALY (Continued)

The ITALIAN LAKES.

VENICE is a 5 hours' journey by rail from Milan, and one of the most delightful places imaginable to pass a quiet atay. The total absence of vehicular traffic strikes one is very strange; no horse, cart, carriage or bicycle is to be seen, and yet there is the sound of life at every turn. The approach the Venice from the Adriatic is unlike that of any other seaport. The town seems to be gradually, like Aphrodite, born of the sea, no hills behind, no stretches of rock, but first the tops of Campaniles appear above the horizon, then slowly the whole gittering town rises like a fairy Going northwards from Milian you make the tour of the beautiful Italian lakes. COMO! the birthplace of the younger Pliny, is reached in one-and-quarter hours by train by way of Monza:
Boats leave Como frequently for the other towns on the lake, which is very beautiful, and

is reached in one-and-equarter hours by train by way of Momes:—
Boats leave Coun frequently for the other towns on the lake, which is very beautiful, and the scenery on either side going up the lake is most each ning; CERNOSBIO is a charming spot; then come Tremezzo, Cadenabin, and Menagyio opposite. The weak many of the Menagyio opposite. The weak of the weak enjoyable A steam train runs from Menagoi to Porlezzo on Lake Lugano in three-quarters of an hour, then steamer to Lugano in two-and-three-quarter hours.

SWITZERLAND

Switzerland, the heart of Europe, has been escribed as "A cluster of delights and

described as "A cluster of delights and grandours."

LUGANO is some 20 miles from Como, and reached by train in one-and-a-half hours. It has a population of 10,000 people and is charmingly situated on the Lake of Lugano, amidst lovely Italian scenery. Are not it rise M Salvatore, M de Caprino and M. Generoso.

LOCARNO may be reached by rail from Bellimona in forty minutes. This pretty town, and the control of the companion of t

Kursaal, Concerts, Casino, Races, Tennis, Boating, etc.

THE BERNESE OBERLAND.—INTER-LAKEN, advourite summer resort, and the best centre for making excursions in the Oberland, abounding in fine walks and views. There is a magnificent view of the Jungfreu from the Hohewag, a fine avenue of walnut trees, the chief resort of visitors. Interlaken is also not far from the famous waterfalls, Giesebach, Trummelbach and Kaiubbach. Then also the glaciers of Grindelcadd and view from Murren and the Schnige Platte, are sights not to be missed.

by English people in Summer and Winter.

GREECE and IONIAN ISLES.

Many people visitGrees after wintening in Egypt, as it is so easily reached from Alexardra; the climate in April is charaing. The best steamers are those of the Khedivida Mal Co. and Russian Steam Navigation Co. If possible tofrists should arrange to be in Athens for the Orthodox Easter in order to witness the Good Friday and Easter Eve ceremonies, and to be present at the dancing on the Easter Towardy featuraheld at Megara for which a special train is run from Athens. It is worth while to spend a few days in CORFU on account of the beauty of the scennery. There is also good snips and quall hooting to be had:

SALISBURY SOUARE

FLEET STREET, LONDON, E.C.

Gentlemen.

EN years ago we established in London the CAXTON TYPE FOUNDRY TEN years ago we established in London the CANTON TYPE FOUNDRY to meaufacture Printing Types on the interchangeable time and labor-saving principles of Standard Point Line, and Point Set on Point Body. We claimed, and have serablished the statement, that the exclusive use of Caxton Printing Types would save one-fourth of the compositors time in the setting, of all kinds of hand composition. At the present time over 10,000 Printers in the United Kingdom, Australaisi, Canada, Africa, the Indian Empire and other British possessions are customars of the Caxton Type Foundry.

As is well known, the type industry of America is controlled by a type TRUST: and in the United Kingdom by a similar organization known as the type RING of British Type Manufacturers

The CAXTON TYPE FOUNDRY was founded to oppose all such combinations. It is independent of all such connections and is therefore, selling type at a lower price and furthermore, guarantees to sell at the same price in all parts of the British Empire

Another branch is the CAXTON WOOD MILLS, the largest and most complete Another branch as the CAATON WOOD MILLS, the largest and most complete Wood Working Plant in the British Empire exclusively employed in the production of space and labour-taving woodwork for Printers. We have made a speciality of using hard wood exclusively in all our productions. Wood Furniture and Reglet is made out of Tungstone, a specially close-grained Wood which is so heavy that it sinks in water, and is therefore particularly valuable.

We are also makers of the widest and the most complete range of PLATEN
PRESSES in the World, comprising the will-known "Caxton" Platen, for fine work:
the lighteruning "Swift" Platen for small printers; the Heddon "Improved Gordon,
variable for any jobbing printer; the Heddon "Safty Platen, "eaphle of printing
2,500 full formes per hour; the Haddon "Improved Victoria," modelled on the Cropper principle, but superior in construction and output.

We invite enquiries, when complete Catalogues with all details will be sent

Yours feithfully.

CLASCOW, 8th October, 1906.

I hereby certify that I have taken samples of every vatting of Mankle's White Horse Collar Blend of Scotch Whisky used in bottling during the month of September, and the results of my analyses indicate that it conforms to the atandard for Pot Still Scotch Whisky set up in the London case. I am also of opinion that it is an old Whisky of excellent quality and flavour, which has been well matured in wood.

THE BRINDISI ROUTE.

"Of late," says the "Times of India," days in the transit of the mails acros ntinent have become incessant, and the are causing considerable irritation in The Peninsular and Oriental Company t in any way responsible. That Company is not in any way responsible. That Condoes, not contract to deliver the ma loss not contract to deliver the mails up Sombay on Friday morning, or at any other to time. It undertaken to deliver then a Bombay within a stipulated number or ours after receiving them at Brindia, and t very rarely fails to fulfil its undertaking hours after receiving them at Brindsia, and it very rarely fails to fulfill its undortaking. Many people seem to regard it as a public grievance that the P, and O. Company does not drive its steamers faster when the mails are late. Every business man, at least, will perceive that that is not a business proposition. Why should the P, and O. Company incur increased expenditure and burn more coal to raise the speed of its ships, in order toans for the shortcomings of the Continental railways? The Company does what it is asked to do, and what it contracts to do, and in point of fact, by far the larger number of its mail deliveries within the year age considerably within contract time.

"The fault lies not with the steamship company, but with the railways, and more particularly with the Italian lines. In spite of the trunk line down the Adriatic is still in a condition unworthy of a great mail route.

to long as so much uncertainty exists bout the passage of the mails over the Alps, and through Italy, in winter we shall never the trivial of the united to rection upon a regular timing of the strival of the mails at Bombay during the cold weather, when passengers are most numerous and business is briskest. It is a discreditable thing that while the transportation of the mails through the Mediterranean and the Red Sea and the Indian Ocean is punctually conducted, progressive Europe seems incapable of arranging for the regular running of its traina. This subject has been so long a matter for complaint that the desirability of considering the ultimate abandonment of the Brindia route is clearly indicated."

MOSLEMS AND THE SULTAN.

MOSLEMS AND THE SULTAN.

A well-informed correspondent of the "Times of India" at Constantinople reports that the Sultan has recently had placed before him a letter from Bombay, which seems to have escaped the vigilance of his secret polica. Copies of the letter, which is printed in Persian have reached both the Grand Visier and the Foreign Minister, and much consternation in the country which is not a word in the document which is not justified by actual facts. The correspondent has no doubt, from internal evidences, that the letter is what it professes to be, the work of some natives of India who have recently visited Turkey and seen for themselves the misgovernment risk throughout the Empire. The letter says that as supreme head of Islam his Majarty is held in veneration by nearly 200,000,000 Moslems in all parts of the world, and remarks that, had in veneration by nearly 200,000,000 Moslems of the world, and remarks that, had his policy been different, it would have been careful in the sum of the world, and remarks that, had his policy been different, it would have been careful for the mutual benefit of those of their correligionists who lack freedom and education. The maladiministration of the Empire was the cause of foreign interference, and his Majarty's earlies were concentrated in endeavours to sow discord anongst European Powers, and so present their working in common ty carry out those reforms which he himself should be twen first introduce. Wherever the writer travelled in the Sultan's dominions they aw officials living by extitetion, and their hearts bled at the sight of the Turkish soldiers starvery first to introduce, Wherever the writer travalled in the Sultan's dominions they aw officials living by extôrtion, and their hearts bled at the sight of the Turkish soldiers star-ving and in rags. In consequence of their ill-treatment the troops now refused to fight against their co-religionists in Xennen. Mosters throughout the world were sahamed that the chief Mostern State should be so lost to allidea of good everyment. Meation is made of throughout the world were anhanced that the whelf Mealem State should be so lost to all idea of good government. Mention is made of Germans being paid large salaries merely to attend the weekly Selamilk in the train of the Sultan, and of the vast sums equandered in the purchase of war material at the bidding of the German Emperor. The Hedjar Railway appears to the writers to be carried on at the present time, whatever its future benefit to pligrims may be, for the sole purpose of putting money into the pockets of the committee, with whom the patronage for contract rosts. The letter compares the freedom enjoyed under Britishreds in India with the tyranny existent in Turkey, and it is remarked "hat under the former the services of upright housed Mohamedans are readily obtainable. The correspondent doubts whether the letter will save any immediate good, as the members of his Majesty's espourage will not allow him to probe these list and to see for himself how stil is the state of affairs. He believes that were the letter will sand to see for himself how stil is the state of affairs. He believes that were the letter externed broadcast throughout the whole Moslem world there would be a general uprising of Islam to demand reform.

Letter from Sir Rudolph von Slatin.

Dear Mr Wart,— Your delightful and most interesting book on the Sou dan has reached me I congratulate you heartily on the excellent manner in whitch the work is written and illustrated. All of ne who have done our little best to regenerate the contry, after its terrible mis fortunes, bave received more than kind treatment at your hands... I don't suppose anyone realises more than I do the change that have more over the Sudan since ny old and tyranolod master the Khalifa di supposered from the scene. Your description of the Peace and Progress' iv, in fac, a squel to my 'Fire and Sword in the Suitan.'

With his det regards believe me, 'Your six overly,' RUD LF V SLATIN.
